

# Mathematics

The school aims to give all children a thorough understanding of number, reasoning, shape, space and data handling. A strong emphasis is also placed on investigative and problem solving activities. The work is delivered through a balance of individual programmes, group work and whole class lessons. Our mathematics curriculum has the overall aim of meeting the individual needs of children of all abilities, as well as offering challenge and enjoyment. Mathematics is applied in cross curricular work to enable children to consolidate key skills. There is a strong commitment to practical activities which support mathematical understanding. We focus on mental arithmetic and times tables which helps children tackle more complex mathematical operations with confidence.
